Merchandising & Display System

An all-encompassing merchandising program guaranteed to add style and class to any discerning retail environment.

1 The focus merchandising system is manufactured from 25 x 25mm square, stainless steel tube. Wall mounted bay modules are available in three standard sizes:

(a) 1400 x 1640mmH

(b) 2400 x 1640mmH

(c) 3600 x 1640mmH

Custom sizes also available to order.

2 Shelving can be supplied in a range of materials including glass in clear float or translucent and timber in various colours and finishes.

Discreet, unobtrusive and versatile

Focus is a contemporary, modular merchandising system that combines the modern element of stainless steel with the timeless elegance of glass or timber.

Engineered for direct fix onto a range of surfaces including timber panels, masonry or plasterboard walls, the Focus merchandising system is manufactured from 25 x 25mm stainless steel tube and produced to order, in a range of standard bay modules.

Height, length, distance from the wall ... whatever your need, we can fabricate the system to your specification.

Even if you have a unique, interior colour accent that you would like to coordinate your fixtures with, we can manufacture in mild steel and powdercoat to suit.

In addition, we also offer a range of freestanding display options to complement the wall display system. Simply choose from one of our designs, or provide your own creative input. Either way, we can tailor a solution to suit your merchandising needs.
